

Montage (688008.SS): Memory interface IC supported by CPU inferencing workload; raising TP to Rmb363/ HK\$510; Buy

We are positive on Montage and expect 38% NI CAGR in 2026-28E, driven by strong demand for memory interface ICs in server memory modules, and high speed interconnection chips (e.g. PCIe / CXL/ Ethernet/ Optical interconnect ICs), which are vital to achieve faster data transmission for AI servers. With the solid 1Q26 results beat ([Read more](#)), our more positive view on the company's growth sustainability, and higher multiple, we raise our TP by ~40%/ 67% to **Rmb363/ HK\$510. Maintain Buy.**

Exhibit 1: Montage: Revenue breakdown (2025-28E)

Source: Goldman Sachs Global Investment Research

Agentic AI inferencing increases memory interface IC demand. With increasing adoption of agentic AI, CPUs are seeing much heavier inferencing workloads such as task management, orchestration, and memory management. This should increase demand for Montage's memory interface ICs, which connect memory modules and CPUs. We expect Montage's RCD revenues to sustain an 8% CAGR growth through 2025-32E supported by the continuous demand growth in general and inferencing servers, and expect that MRCD/ MDB (for server memory modules with faster bandwidth) to grow at 98% CAGR in 2025-32E supported by growing penetration of MRDIMM technology.

Continuous new product development. Revenues from four new products (MRCD/MDB, PCIe retimer, CKD, and CXL MXC) reached Rmb269m in 1Q26, or 19% of the Interface IC segment. Per management, Montage's the PHY retimer will tape out in 2026, and the PCIe switch will tape out in 2026; Optical interconnect ICs are in R&D. We expect the products in the pipeline to see strong demand once introduced to the market, as they are high-end/high-speed interconnect chips with few

suppliers and growing demand.

Earnings revision: Our 2026–32 net income estimates are revised up by 4%–10%, mainly on higher revenues and higher GM. Higher revenues in 2026–32E reflect a positive outlook for: (1) the existing memory interface IC business, driven by growing CPU and RDIMM/MRDIMM usage; and (2) new products in the pipeline. Higher GM reflects a higher mix of new products. Montage typically generates high GM when new products first launch; GM then declines over time with annual price decreases. Opex estimates are unchanged.

Valuation: With changes to our 2026–32 earnings estimates and updated target P/E, we raise our TP for A-share/ H-share by ~40%/ 67% to **Rmb363/ HK\$510**.

For the A-share, our 12M target price of Rmb363 is based on a 45.2x (vs. 35x previously) 2030E discounted P/E, against 33% average EPS growth in 2030–31E. Our target P/E multiple of 45.2x is derived from peers’ P/E and NI growth correlation (Exhibit 3), which we roll over to be based on 2027 P/E and 2027–28E EPS growth (vs. previously 2026E P/E and 2026–27E EPS) and refresh to mark to market.

For the H-share, our 12M target price of HK\$510 is based on a 58.3x 2030E P/E (29% valuation premium over the A-share and using a 1.09 CNY/HKD). The H-A premium is based on the last 20-trading-day average H-A premium of the company. The previous 8% H-A premium is derived from the avg. historical trading premium of Gigadevice, Weichai, and BYD. Now that with more trading data of Montage H share, we believe it’s warranted to use the stocks’ own trading historicals to derive the premium assumption.

Exhibit 11: Montage Glossary table

General terms	Description
PCIe	Peripheral Component Interconnect Express, a high-speed serial computer expansion bus standard
Retimer	Mixed signal analog/ digital device to enable longer physical channels in servers and storage systems
CKD	Client Clock Driver, devices designed to buffer the clock between the host controller and DRAM
CXL	Compute Express Link, open standard for high-speed, high capacity central processing unit (CPU)-to-device and CPU-to-memory connections
DDR5	Double Data Rate 5, a type of synchronous dynamic random-access memory, reducing power consumption compared to DDR4
DDIM	Dual In-line Memory Module, containing an array of RAM chips mounted on the motherboards
MRCD/MDB	Multiplexed Registered Clock Driver (MRCD) and Multiplexed Data Buffer (MDB) on DIMMs to buffer the Command/Address bus, chip selects and clock between the host controller and the DRAMs
MXC	Memory Expander Controller, enabling high-speed and low-latency interconnect between CPU and GPU

Price target methodology and risks - Montage

Valuation methodology: For the A-share, our 12M target price of **Rmb363.0** is based on a **45.2x 2030E discounted P/E**. Our target P/E multiple of 45.2x is derived from peers' P/E and NI growth correlation. For the H-share, our 12M target price of **HK\$510.0** is based on a **58.3x 2030E P/E** (29% valuation premium over the A-share and using a 1.09 CNY/HKD).

Key downside risks are: 1) Weaker-than-expected memory interface IC market growth; 2) slower-than-expected new product introductions; and 3) Fiercer-than-expected market competition.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your

individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators.
