

June 1, 2026 04:06 AM GMT

Apple, Inc. | North America

# WWDC 2026 – What's The Upside If Apple Goes Agentic?

The "AI winner" narrative has served as an inflection point for many stocks since 2023. WWDC 2026 could catalyze a similar shift for Apple, where a polished AI platform and clear Agentic vision could push valuation to \$365-385, with upside to \$440. June 8 is a key catalyst for the stock.

AlphaWise

## Key Takeaways

- WWDC 2026 is a pivotal catalyst to reframe Apple as an "AI winner," potentially driving multiple expansion similar to WWDC 2024's 20pt outperformance.
- A more agentic, conversational Siri plus improved Apple Intelligence capabilities could position Apple as a scaled AI platform across its massive device base.
- Privacy-first, hybrid AI architecture and multi-LLM partnerships differentiate Apple as an AI distributor rather than a single-model competitor.
- Successful AI execution could accelerate iPhone upgrades, lift Services monetization, and potentially unlock meaningful EPS and valuation upside into FY27.
- Low investor expectations create a favorable setup for narrative re-rating, with Scenarios 2-3 implying \$365-440/share upside potential.

I'd greatly appreciate your support for the Morgan Stanley IT Hardware & EMS team in this year's All-America Extel survey. Thank you so much! Erik

How to vote: To request a ballot, please go to <https://www.extelinsights.com/voting> and select "All-American Research Team".

**WWDC 2026 serves as a real opportunity to shift the Apple investment narrative.** To-date, Apple has performed purely on the back of underlying Products and Services strength; AI has been effectively irrelevant to the story. But as we've seen across numerous companies and industries over the last 12-24 months, being seen an "AI Winner" drives a clear inflection in fundamentals, valuation, and sometimes both. We believe Apple's Worldwide Developers Conference (WWDC) is a clear catalyst that can help shift Apple into the "AI Winner" bucket (perceived or

Morgan Stanley does and seeks to do business with companies covered in Morgan Stanley Research. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of Morgan Stanley Research. Investors should consider Morgan Stanley Research as only a single factor in making their investment decision.

**For analyst certification and other important disclosures, refer to the Disclosure Section, located at the end of this report.**

otherwise), just as WWDC 2024 did when Apple outperformed by 20 points on the back of 6x turns of multiple expansion. Apple now has the fundamental technology backbone (GOOGL Gemini backing Apple Foundation Models), the industry-leading security standard, and *appears* to have a reformulated AI strategy (a new Siri and Apple Intelligence platform) needed to compete with incumbent consumer-centric Agentic platforms – all at a time where the market is starving for a new AI platform that can ease the myriad shortages that exist across AI today. Said differently, Siri/Apple Intelligence 2.0 has the potential to become the ultimate AI resource offload and deliver a form of Agentic AI to the consumer at a lower cost than incumbents, vertically integrated across one of the largest device installed bases. If WWDC 2026 successfully outlines this path – please see [Exhibit 1](#) for how we define “success” – we see valuation potentially reaching \$365-385, all the way up to \$440 per share.

**We think Cupertino is positioned to deliver and reiterate our OW rating.**

**Exhibit 1:** We outline 3 scenarios to assess the success – and EPS/valuation impact – of WWDC 2026.

	Scenario 1 Status Quo	Scenario 2 Concrete Progress	Scenario 3 Dream The Dream
Probability	30%	65%	5%
Impact on Fundamentals	Stable iPhone replacement cycles and Services growth	Modestly faster iPhone upgrades and incremental contributions from non-iPhone hardware and Services	Continued replacement-cycle contraction over the N18M and meaningfully faster Services growth
Price Targets (and Valuation)	<b>\$330</b> (30-31x FY27 EPS of \$10-10.5)	<b>\$365-385</b> (35x FY27 EPS of \$10.5-11)	<b>\$385-440</b> (35-40x FY27 EPS of \$11+)

Source: Morgan Stanley Research estimates

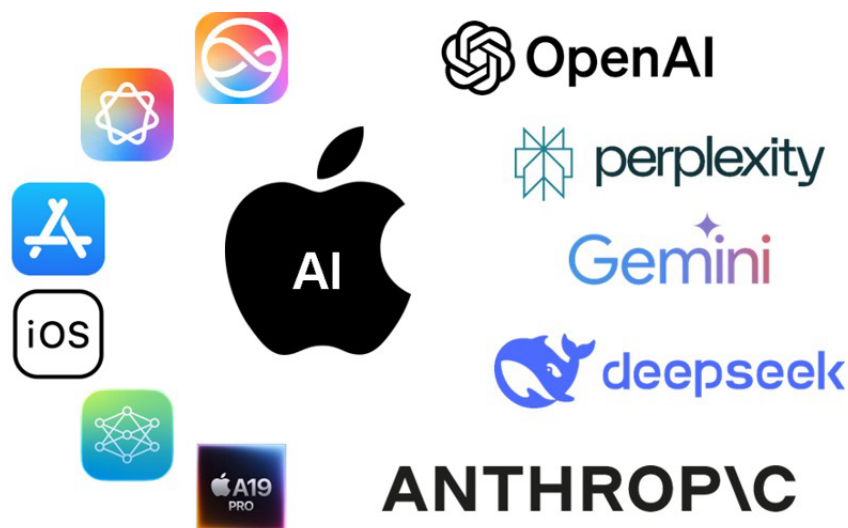

Note: The probabilities shown are only illustrative. They do not forecast a precise series of events and do not account for all possible outcomes but instead illustrate our sense of the relative plausibility of selected scenarios, based on current industry dynamics.

**We expect WWDC 2026 to focus on Apple's re-strategized AI approach featuring Apple Intelligence and Siri.** The centerpiece of WWDC 2026 will be a more conversational Siri that looks and feels closer to mainstream AI chatbots (e.g. ChatGPT, Gemini, or Claude), with support for persistent chat history, stronger contextual awareness, on-screen understanding, deeper Siri-to-app text and voice control, and more natural, chatbot-style interactions – “Siri, can you make a reservation for the steakhouse on my screen... for party of 4... actually, make it 6 for tonight.” Said differently, we expect Apple to position Siri as a more “Agentic” virtual assistant. Beyond Siri, Apple Intelligence functionality should expand meaningfully within iOS 27, macOS 27 and iPadOS 27, adding improved writing/summary/image-generation tools, natural-language Shortcuts creation, and broader system-wide AI integration across 1P apps such as Safari, Camera, and Weather. And finally, we expect Apple to emphasize a deepened partnership with GOOGL (covered by Brian Nowak) while also opening Siri to numerous third-party AI models, providing “user choice” and positioning Apple as a unique distributor of AI.

**Apple's focus on privacy, model flexibility, and AI feature enhancements could prove to be the keys for consumer adoption... but the details are critical.** We expect Apple to continue positioning privacy as a primary differentiator vs. other

platforms, supported by features such as auto-deleting chat history, tighter memory controls, and heavier reliance on Private Cloud Compute (PCC) and/or on-device processing. At the same time, Apple's reported strategy of working with multiple third-party AI models – and giving users flexibility based on task (e.g. Codex with Claude for coding, Gemini for image/video generation, or any other external LLMs within Siri and Apple Intelligence features) – would position Apple at the center of the broader consumer AI experience rather than tying it to a single model and competing with incumbents at the LLM level ([Exhibit 2](#)). In our view, this approach has the potential to differentiate Apple Intelligence from today's standalone chatbot apps, at a time where switching costs are still low. While iPhone users' adoption of Apple Intelligence was as high as 80% (ex-China) as of late last year, based on our [2025 Smartphone Survey](#), feature enhancements enabled by third-party LLMs as well as better AFMs (Apple Foundation Models) still represent a tipping point for stronger engagement. **That said, Apple's privacy-first stance and growing reliance on external models also raise important questions around execution** – e.g. how automated the Siri-driven AI experience can ultimately be, how much functional limitation will exist between Apple Intelligence/Siri and third-party apps, and whether a privacy-heavy framework can deliver AI experiences that are comparable – or superior – in terms of automation, integration, and overall usability. These are not trivial details in our perspective, and are likely to have a major impact on consumer adoption. We'll be monitoring these closely.

**Exhibit 2:** We believe Apple's AI intention is to leverage AI (through internal efforts and external partnerships) to monetize their well-established eco-system as a platform.

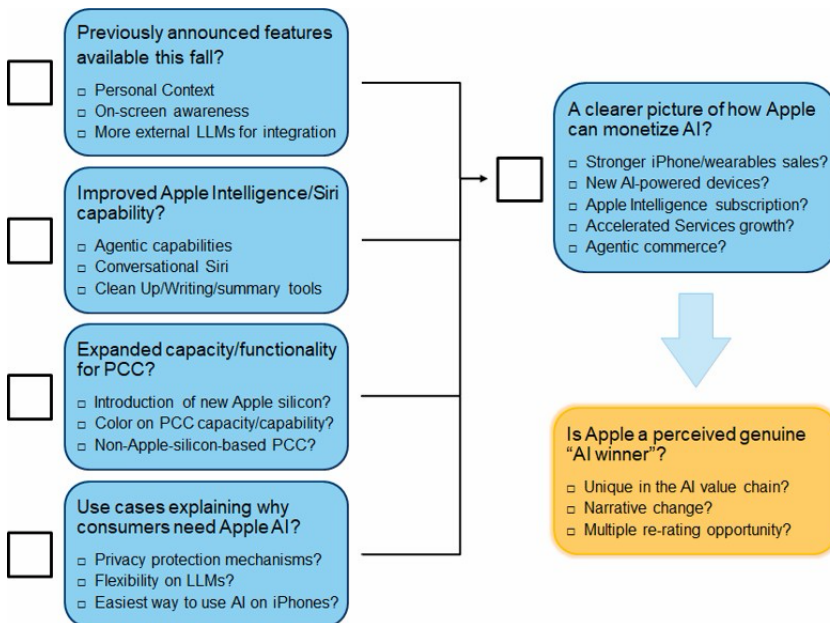

Source: Company data, Morgan Stanley Research

**The key question is – does this mean Apple is finally on the verge of becoming a perceived “Agentic” winner?** After seeing GOOGL demonstrate Agentic AI capabilities at [I/O '26 keynote](#), we believe WWDC 2026 is Apple's opportunity to more clearly articulate its own Agentic AI offerings. For the keynote next Monday, we are focused on several key signals: (1) confirmation that previously announced Apple Intelligence features – such as personal context and on-screen awareness – will be available later this Fall alongside iOS 27, even if initially in "beta"; (2)

improved Apple Intelligence and Siri usability driven by deeper integration with external LLMs (e.g. ChatGPT and Gemini) and more powerful Apple Foundation Models; (3) expanded capacity and functionality for Private Cloud Compute to support Apple Intelligence inferencing at scale (we wrote about this [here](#)); and (4) clearer, more concrete use cases explaining why and when users should rely on Apple's AI even if they already subscribe to third-party LLMs. While we do not expect Apple to explicitly outline an AI monetization strategy at WWDC given its developer focus, progress across these areas should allow investors to better infer how Apple can ultimately monetize AI across its silicon, software, and hardware ecosystem. If Apple can check these boxes, we believe the stock narrative should shift, with valuation re-rating first as the market increasingly perceives Apple as an "AI winner", followed by future monetization ( [Exhibit 3](#) ).

**Exhibit 3:** WWDC 2026 check list – is Apple finally on the verge of going "Agentic"?

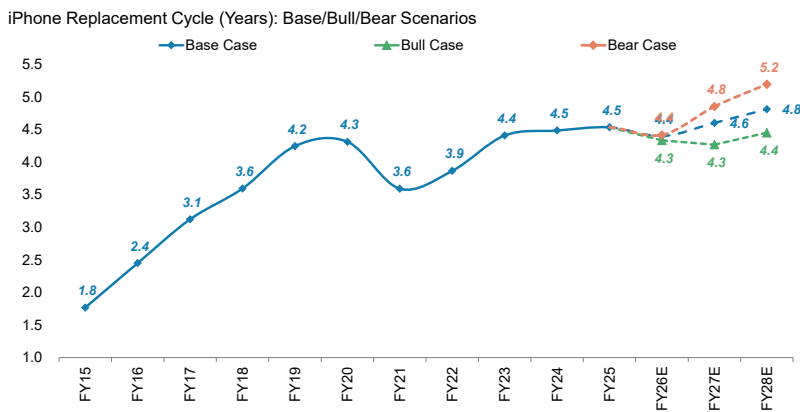

Source: Morgan Stanley Research

**What does a successful AI mean for Apple financially? We see multiple paths to accelerate growth.** For the iPhone, we estimate that more than 50% of the 1.6B+ installed base will still be incapable of running Apple Intelligence (e.g. own an iPhone 15 or older) exiting this Fall; however, if Apple introduces truly compelling AI features, we would foresee improving upgrade rates with stabilizing or accelerating replacement cycles into FY27 ( [Exhibit 4](#) ). Combined with Apple's relatively favorable memory supply position, faster upgrade rates could also drive incremental share gains, where every 50bps of global smartphone market share gains (iPhone currently ~20% of T12M shipments) equates to ~5M additional iPhone shipments or 14c of incremental EPS. Beyond iPhone, enhanced AI functionality should also deliver faster revenue growth in Mac, iPad, and Wearables/Accessories, supported by broader hardware adoption as AI functionality creates stronger cross-device functionality, and the future introduction of Apple Intelligence-enabled devices (e.g. camera-equipped AirPods, smart glasses, AI pendants, and smart home products).

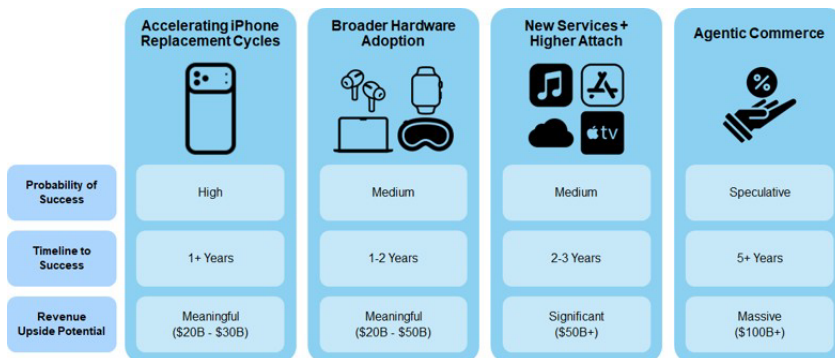

For Services, a future Apple Intelligence subscription priced at \$9.99 per month would add ~\$2B of incremental annual Services revenue (or 40bps of total revenue) for every 1% iPhone installed base adoption, translating into 10c of incremental EPS upside in FY27, all else equal. Apple could also gain greater pricing power across Services as first-party offerings become more differentiated through AI. Finally, if Agent-driven experiences (i.e. Siri) prove valuable to both consumers and ecosystem partners – we see a world where Apple Intelligence stands as a critical middle-layer to enable Agentic commerce across Apple devices, adding up to \$70B+ of incremental revenue in the US alone (Exhibit 6).

**Exhibit 4:** While inherently uncertain, our bull case shipments of 289M (+7% Y/Y) imply stabilizing iPhone replacement cycles into FY27, assuming Apple's AI offerings are attractive enough to drive shipments despite potential like-for-like pricing increases for iPhone 18 family.

Source: Company data, Morgan Stanley Research estimates

**Exhibit 5:** What are the financial implications of Apple's AI re-introduction?

Source: Morgan Stanley Research

**Exhibit 6:** We estimate that Apple can collect \$1-70B+ of annual revenue solely in the US from its Agentic AI efforts that facilitate household expenditures through Apple devices.

Apple's US Agentic Commerce Opportunity, 2028			
Agentic Commerce GMV Calculation	Base Case	Low	High
Number of US Households (K)	135,760	135,760	135,760
Average Annual Expenditures (\$)	84,159	84,159	84,159
2028 US Total Household Expenditures (\$B)	11,425	11,425	11,425

3% (The payment fee Apple collects on App Store)	18	12%	
5%	30	19%	
7%	42	27%	
12% (Amazon's non-FBA commission rate)	71	46%	

Source: Company data, Morgan Stanley Research estimates. Note: Average Annual Expenditures are inflation-adjusted from 2024 data.

**Importantly, investor expectations for Apple's AI reboot remain relatively low.**

Based on our Survey work over the past 2 years, we would characterize consumer sentiment toward Apple Intelligence (and Apple's AI efforts more broadly) as moving from anticipation in September 2024 (driven by enthusiasm from WWDC 2024), to initial validation and adoption by March 2025, and ultimately to disappointment in late 2025. Importantly, consumers continue to view Gen AI as a key smartphone feature – generative AI ranks as the #4 reason in purchase or upgrade decisions (Exhibit 7) – but our survey data point to a steady deterioration in consumer perception of Apple Intelligence over the past 18-24 months. For context, Apple Intelligence fell from the #5 reason to upgrade in our 2024 Survey to #7 in our 2025 Survey (Exhibit 8), while the share of iPhone users willing to pay for a monthly Apple Intelligence subscription declined 10 points Y/Y, to 68%, in our 2025 Survey (Exhibit 9).

Investors that we've spoken to would generally agree that Apple is well positioned to act as an "AI distributor," leveraging its tightly integrated software, hardware, and silicon ecosystem as well as its large device installed base (1.5B+ iPhones exiting CY25). However, execution remains the primary concern. Taken together, we would characterize both consumer and investor expectations for WWDC 2026 as fairly low – and notably lower than heading into WWDC 2024 – making WWDC a critical catalyst to re-rate shares. For context, GOOGL now trades at 27.4x forward EPS, much higher than the T3Y average of 20.6x given improved fundamentals and greater AI confidence, highlighting the potential valuation re-rating that can come from improved AI execution shifting investor perception.

**Exhibit 7:** Smartphone owners in general (Apple + Android) continue to rank AI technologies as the #4 reason to upgrade, with the US actually showing Y/Y improvement in ranking.

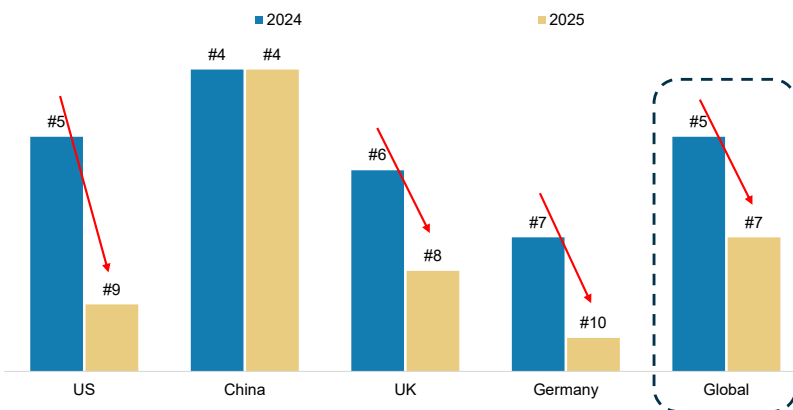

Access to AI Tech as The Ranking of Reasons to Upgrade Smartphone

Source: AlphaWise, Morgan Stanley Research

**Exhibit 8:** Apple Intelligence ranked as the #7 reason to upgrade to an iPhone, with the US showing the most significant Y/Y deterioration in ranking.

Access to Apple Intelligence as The Ranking of Reasons to Upgrade iPhone

Source: AlphaWise, Morgan Stanley Research

**Exhibit 9:** 68% of global iPhone owners are willing to pay to get unlimited access to Apple Intelligence, 10 points lower Y/Y.

Global iPhone Users: Willingness To Pay Monthly For Unlimited Access To Apple Intelligence Features

### So what is the upside to our base case forecasts and valuation approach if

**WWDC 2026 is successful? (Exhibit 1)** We are not changing our estimates or PT ahead of the event, but see three potential post-WWDC scenarios for Apple's valuation and earnings path. **Scenario 1 (30% probability):** Apple delivers incremental updates to Apple Intelligence and Siri, but stops short of meaningful progress on Agentic AI or providing a clear delivery timeline, keeping the status quo intact. **Scenario 2 (65% probability):** Apple offers more concrete Agentic AI use cases and demonstrates upgraded AI capabilities leveraging its privacy-focused hybrid AI architecture, alongside greater visibility into feature rollout timing, allowing for investors to embed some future AI monetization across Hardware and Services. **Scenario 3 (5% probability):** Apple delivers everything in Scenario 2 and more, allowing investors to "dream the dream" for Apple's AI monetization positioning within the broader AI debate.

Under Scenario 1, we would expect shares to reach \$330 (our current PT), implying \$10-10.50 of FY27 earnings power (supported by stable iPhone replacement cycles and Services growth) at a 30-31x P/E. Under Scenario 2, shares could move toward \$365-385, implying \$10.50-11 of FY27 earnings power (underpinned by modestly faster iPhone upgrades and incremental contributions from non-iPhone hardware and Services) and a 35x P/E. Under Scenario 3, shares could reach \$385-440, implying \$11+ of FY27 earnings power (driven by continued replacement-cycle contraction over the next 18 months and meaningfully faster Services growth) at a 35-40x P/E.

### Is now the most exciting time for Apple in 20+ years? It could be – with multiple TAM-expanding offerings likely to come beyond WWDC, under the leadership of

**a new CEO.** We view WWDC 2026 as a positive near-term catalyst for the stock, with AI success increasingly narrative-changing, even for a ~\$4.5T company. But looking beyond WWDC, we see multiple paths to TAM-expanding opportunities as well: (1) the September iPhone launch, where pricing dynamics and the introduction of a Foldable iPhone will be key, (2) the rollout of iOS 27 toward the end of CY26 as an important checkpoint on Apple's AI platform, (3) the launch of new AI-enabled

wearables (including camera-equipped AirPods, smart glasses, and an AI pendant) later this year and into early 2027, (4) the introduction of a new smart-home product family (e.g., smart display, security camera, and tabletop device) potentially in C1H27, and (5) the 20th anniversary iPhone launch in C2H27. Apple's incoming CEO John Ternus, has publicly stated that "*this is the most exciting time in my 25-year career at Apple*," a sentiment we would agree with. That said, execution is key, and we will continue to monitor risks such as memory costs, geopolitics, slowing App Store growth, and competition going forward.

## Risk Reward – Apple, Inc. (AAPL.O)

More Near-Term Cost Uncertainties Before a Catalyst-Laden 2H

### PRICE TARGET \$330.00

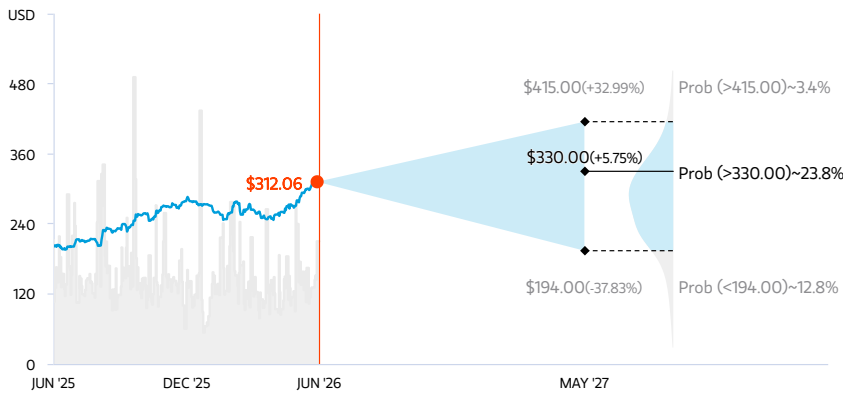

Our \$330 PT is based on an 8.3x EV/Sales FY27 multiple, which is derived from a regression of tech and consumer platform peers. Our price target implies ~32x P/E on \$10.23 FY27 EPS.

#### Consensus Price Target Distribution

Source: Refinitiv, Morgan Stanley Research

### RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Key: — Historical Stock Performance ● Current Stock Price ◆ Price Target

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 29 May 2026. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology [here](#)

### OVERWEIGHT THESIS

With the most elongated iPhone replacement cycles, new AI features rolling out around the world, and a renewed focus on device form factor changes, we believe Apple can accelerate iPhone growth starting in FY26, with replacement cycles peaking as aged installed base starts to upgrade. When combined with consistent, double digit services growth and moderate operating leverage, we believe Apple can earn \$8.89 in FY26 and \$10.23 by FY27. Memory cost dynamic could create uncertainties in the near term. Longer-term, investments in AI, payments, cloud, health, and home, and long runway to grow spend per user from \$1/day today are key arguments for sustained long-term growth and value creation.

#### Consensus Rating Distribution

Source: Refinitiv, Morgan Stanley Research

#### Risk Reward Themes

Disruption: Positive  
 New Data Era: Positive  
 Pricing Power: Positive

View descriptions of Risk Rewards Themes [here](#)

#### BULL CASE

**\$415.00**

10.9x EV/Sales FY27; 39.1x Bull FY27 P/E of \$10.60

**iPhone replacement cycles accelerate in FY26/FY27 with Robotics as a long-term upside.** Consumer demand returns, and stronger than expected iPhone 17 upgrade intentions + mix shift to higher end iPhones drives mid-teens Y/Y iPhone revenue growth, while rising component costs are mitigated given Apple's bargaining power against consumers and the supply chain. Our bull case valuation implies a 39.1x P/E multiple on FY27 Bull EPS, which embeds \$22 per share of upside from its Robotics efforts.

#### BASE CASE

**\$330.00**

8.3x EV/Sales FY27 or ~32x FY27 EPS of \$10.23

**Services and margins remain resilient, while investors start to expect stronger iPhone cycles ahead.** Revenue grows 14% Y/Y in FY27, driven by 10%+ Services growth and mid-teens % Products growth. GM may contract Y/Y in FY27 driven by higher Product revenue mix and memory costs, while Apple leverages the supply chain and repricing to mitigate the cost impact. The iPhone replacement cycle are peaking and create pent up demand for upgrades in FY27.

#### BEAR CASE

**\$194.00**

6.3x EV/Sales FY27; 24.6x FY27 Bear EPS of \$7.89

**iPhone 17 cycle disappoints as consumer spending weakens more than expected amidst synthetic price increases.** Growth slows further across the portfolio as discretionary income is pressured by hard landing, leading to just LSD of Product rev growth and decelerating Services rev growth in FY26. With revenue slightly growing but margin contracting, FY26 EPS will only grow MSD to ~\$7.36. Our bear case valuation implies a 24.6x FY27 P/E, below T5Y avg of 26.0x due to plateauing Services profit mix.

## Risk Reward – Apple, Inc. (AAPL.O)

### KEY EARNINGS INPUTS

Drivers	2025	2026e	2027e	2028e
Total Revenue Growth (Y/Y) (%)	6.4	16.6	14.1	5.5
iPhone Revenue Growth (Y/Y) (%)	4.2	23.6	18.6	3.9
Services Revenue Growth (Y/Y) (%)	13.5	14.0	11.6	10.2
Gross Margin (%)	46.9	48.0	47.6	47.9
EPS Growth (Y/Y) (%)	10.6	19.1	15.1	6.7

### INVESTMENT DRIVERS

- Positive iPhone build revisions / clearer signs of accelerating replacement cycles
- Services revenue growth reacceleration
- Apple Intelligence feature and distribution expansion
- New product launches in home, health and AI

### GLOBAL REVENUE EXPOSURE

Source: Morgan Stanley Research Estimate  
View explanation of regional hierarchies [here](#)

### MS ALPHA MODELS

<b>3/5</b> BEST	<b>24 Month</b> Horizon	<b>1/5</b> MOST	<b>3 Month</b> Horizon
--------------------	----------------------------	--------------------	---------------------------

Source: Refinitiv, FactSet, Morgan Stanley Research; 1 is the highest favored Quintile and 5 is the least favored Quintile

### RISKS TO PT/RATING

#### RISKS TO UPSIDE

- iPhone 17 outperforms expectations
- Apple Intelligence adoption surprises to the upside
- Apple pulls forward form factor changes
- Services growth re-accelerates despite tougher compares
- Gross margins surprise positively

#### RISKS TO DOWNSIDE

- Weak consumer spending limits iPhone upgrade rates
- Higher memory input costs
- Limited progress on AI features
- Geopolitical tensions
- Increased regulation, particularly with App Store

Alternatively you may contact your investment representative or Morgan Stanley Research at 1585 Broadway, (Attention: Research Management), New York, NY 10036 USA.

### Analyst Certification

The following analysts hereby certify that their views about the companies and their securities discussed in this report are accurately expressed and that they have not received and will not receive direct or indirect compensation in exchange for expressing specific recommendations or views in this report: Erik W Woodring.

### Global Research Conflict Management Policy

Morgan Stanley Research has been published in accordance with our conflict management policy, which is available at [www.morganstanley.com/institutional/research/conflictolicies](http://www.morganstanley.com/institutional/research/conflictolicies). A Portuguese version of the policy can be found at [www.morganstanley.com.br](http://www.morganstanley.com.br)

### Important Regulatory Disclosures on Subject Companies

The analyst or strategist (or a household member) identified below owns the following securities (or related derivatives): Maya C Neuman - **Apple, Inc.**(common or preferred stock).

As of April 30, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: **Apple, Inc.**, CDW Corporation, Cricut Inc, Dell Technologies Inc., Everpure, Inc., Garmin Ltd, Hewlett Packard Enterprise, HP Inc., IBM, Kornit Digital Ltd., Logitech International SA, NetApp Inc, Resideo Technologies Inc, Seagate Technology, SmartRent, Inc., Sonos Inc., Teradata, Western Digital.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Dell Technologies Inc., Ingram Micro.

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from CDW Corporation, Dell Technologies Inc., Seagate Technology.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from **Apple, Inc.**, CDW Corporation, Dell Technologies Inc., Everpure, Inc., Garmin Ltd, GoPro Inc, Hewlett Packard Enterprise, HP Inc., IBM, Ingram Micro, Kornit Digital Ltd., Logitech International SA, NetApp Inc, Nutanix Inc, Resideo Technologies Inc, Seagate Technology, SmartRent, Inc., Sonos Inc., Teradata, Western Digital.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from **Apple, Inc.**, CDW Corporation, Dell Technologies Inc., Hewlett Packard Enterprise, HP Inc., IBM, Ingram Micro, NetApp Inc, Seagate Technology.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: **Apple, Inc.**, CDW Corporation, Dell Technologies Inc., Everpure, Inc., Garmin Ltd, GoPro Inc, Hewlett Packard Enterprise, HP Inc., IBM, Ingram Micro, Kornit Digital Ltd., Logitech International SA, NetApp Inc, Nutanix Inc, Resideo Technologies Inc, Seagate Technology, SmartRent, Inc., Sonos Inc., Teradata, Western Digital.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: **Apple, Inc.**, CDW Corporation, Dell Technologies Inc., Everpure, Inc., Garmin Ltd, Hewlett Packard Enterprise, HP Inc., IBM, Ingram Micro, NetApp Inc, Nutanix Inc, Resideo Technologies Inc, Seagate Technology, Sonos Inc.

An employee, director or consultant of Morgan Stanley is a director of HP Inc.. This person is not a research analyst or a member of a research analyst's household.

Morgan Stanley & Co. LLC makes a market in the securities of Garmin Ltd, Resideo Technologies Inc, Sonos Inc., TD Synnex Corporation, Teradata.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

### STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

### Global Stock Ratings Distribution

(as of May 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a

buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1542	42%	465	51%	30%	707	43%
Equal-weight/Hold	1571	43%	369	40%	23%	723	44%
Not-Rated/Hold	3	0%	0	0%	0%	1	0%
Underweight/Sell	551	15%	86	9%	16%	201	12%
Total	3,667		920			1632	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

### Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

### Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

### Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at [www.morganstanley.com/online/researchdisclosures](http://www.morganstanley.com/online/researchdisclosures). For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>. Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

### Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Apple, Inc., Western Digital. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (<http://www.morganstanley.com/terms.html>). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use (<http://www.morganstanley.com/terms.html>). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy ([http://www.morganstanley.com/privacy\\_pledge.html](http://www.morganstanley.com/privacy_pledge.html)), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley processes personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy ([http://www.morganstanley.com/privacy\\_pledge.html](http://www.morganstanley.com/privacy_pledge.html)). Please use the provided link to review the Terms and Conditions and Most Important Terms and Conditions for Morgan Stanley India Company Private Limited ([https://www.morganstanley.com/assets/pdfs/about-us-global-offices/india/Terms\\_and\\_conditions.pdf](https://www.morganstanley.com/assets/pdfs/about-us-global-offices/india/Terms_and_conditions.pdf)) and the following link to review the audit report (<https://ny.matrix.ms.com/eqr/research/webapp/researchdocs/>)

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.

Morgan Stanley is not incorporated under PRC law and the research in relation to this report is conducted outside the PRC. Morgan Stanley Research does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. Neither this report nor any part of it is intended as, or shall constitute, provision of any consultancy or advisory service of securities investment as defined under PRC law. Such information is provided for your reference only.
